

AMIT BORA

Senior Backend Developer

+91 8527520048 | amitbora007@gmail.com | [LinkedIn](#) | [GitHub](#) | Noida

PROFESSIONAL SUMMARY

6+ years Senior Backend Engineer specializing in cloud-native microservices, secure RESTful APIs, and scalable systems. Expert in PHP, Python, Laravel, Django/DRF, Redis, and SQL. Delivered end-to-end payment, AI-powered, and enterprise solutions on AWS/Azure with strong focus on performance, reliability, and maintainability.

TECHNICAL SKILLS

Programming Languages: PHP (7/8), Python (3.x), JavaScript

Frameworks: Laravel, Restler, Django, Django REST Framework (DRF), FastAPI

Frontend: React.js

Backend: Node.js

Tools: Git, Power BI

Databases: MySQL, SQL Server, MongoDB, Vector Databases, Redis

Platforms: AWS, Azure Functions, Azure Service Bus

Library: OpenAI APIs, LangGraph, Scikit-learn, OpenCV

PROFESSIONAL EXPERIENCE (6+ YEARS)

Specialist Engineer | Jan 2021 - Present

Successive Digital | Noida

- Owned **end-to-end delivery** for backend services in enterprise applications, ensuring scalability, performance, and secure integrations.
- Boosted partner integration efficiency by 40% via **optimized APIs** and close collaboration with product, QA, and DevOps.
- Enhanced API response times by 33% through database tuning, **Redis caching**, and code refactoring.
- Architected microservices-based payment systems using PHP/Python with Azure Functions, Service Bus, and Key Vault to deliver **secure, scalable** workflows.
- Led **architecture reviews, code reviews, and documentation**, improving maintainability and engineering velocity.
- Integrated **Generative AI** into development workflows to accelerate coding and problem-solving.
- Drove **cross-functional delivery**, increasing partner onboarding throughput by 40% and improving client satisfaction by 80%.

Technologies Used: PHP (7/8), Python (3.x), Restler, Laravel, Redis, MySQL, SQL Server, Azure Functions, Azure Service Bus, Azure Key Vault, AWS, Git

Analyst | Feb 2019 - Dec 2020

Cyborg Cyber Forensics and Information Security | Noida

- Designed and developed web-based applications aligned with business and technical requirements, driving **requirements-driven delivery**.
- Led **Helpdesk and Inventory Management System**, reducing manual intervention by 50% through **workflow automation**.
- Collaborated across teams to implement an LMS with Moodle and Azure AD, enabling **scalable online education**.
- Conducted **requirement analysis, solution design**, and deployment to improve release quality and predictability.

Technologies Used: Django, Django REST Framework, MySQL, Azure Active Directory, Moodle, Git

PROJECTS

Spire – Payment Processing System | US Clients

Secure EFT and ACH payment platform exposing RESTful APIs with Redis caching and SQL Server, integrated with Azure AD for authentication and compliance.

- Built and optimized REST APIs using PHP (Restler) with **Redis caching**, reducing transaction latency by **40%** and increasing throughput by **200+TPS**.
- Implemented **enterprise-grade security** via Azure AD and hardening, lowering auth errors by 50% and meeting compliance checks.

Microservices-Based Payment Processing | Spire-Payliance Integration

Microservices architecture for payment workflows using Azure Functions, Service Bus, Key Vault, and Application Insights for serverless execution and observability.

- Deployed **serverless workflows** with Functions and Service Bus, cutting operational overhead by **14 hours/week** and achieving **more than 80%** uptime.
- Centralized secrets in **Key Vault** and instrumented telemetry, lowering incident MTTR by **40%** through proactive monitoring.

GenAI-Based Customer Support System | KagenAI

AI chatbot using Python, OpenAI, LangGraph, and MongoDB Vector DB to automate responses and integrate Zendesk ticket creation via chat and email.

- Built **LLM-powered automations** that resolved over **70%** of customer queries autonomously, cutting average response time by **10 minutes**.
- Integrated **Zendesk ticketing**, increasing agent productivity by **30%** and reducing backlog by **50%**.

Inventory Management System | CCFIS

Django and DRF-based application with Bootstrap UI for efficient stock tracking, reporting, and streamlined inventory workflows.

- Delivered **role-based** dashboards, reducing manual effort by **40%** and improving data accuracy by **80%**.
- Optimized **report generation**, lowering processing time by **30%** and boosting stakeholder adoption by **60%**.

Learning Management System (LMS) | CCFIS

Moodle-based LMS with RBAC and Azure AD integration to simplify user management and support scale for online education.

- Implemented **RBAC and SSO** via Azure AD, reducing access issues by **50%** and supporting **200K** concurrent learners.
- Automated **course workflows**, saving over **2-3 hours/week** of admin effort and increasing completion rates by **40%**.

EDUCATION

Master of Technology (Computer Science & Engineering) | August 2019

Amity University | Noida

Bachelor of Technology (Computer Science & Engineering) | April 2016

Echelon Institute of Technology | Faridabad

CERTIFICATIONS

- AWS Certified Developer – Associate, 2023
- MongoDB Associate Developer, 2023

- Certified Agile Leadership Essentials – CAL-E, 2023
- Building AI Apps with MongoDB on AWS, 2025
