AMIT BORA

Fullstack Engineer | Cloud-Native Microservices | Payment Systems | Practical AI

New Delhi, India • +91 8527520048 • amitbora007@gmail.com • Portfolio: amitbora.vercel.app

LinkedIn: in/amitbora2 • GitHub: amitbora007 • Credly: amit.bora

PROFESSIONAL SUMMARY

Fullstack Engineer with **7+ years of experience** building high-craft web applications, scalable cloud microservices, high-throughput payment gateways, and production Generative AI integrations. Proven track record engineering fullstack systems at Successive Digital, pairing reactive React.js frontends and modern UI architectures with distributed backends, optimizing API performance by **33%–40%**, sustaining **200+ TPS** transactional workloads, and cutting MTTR by 40% across Azure and AWS. Certified AWS Developer, MongoDB Associate Developer & GraphQL Developer with 3 published IEEE research papers. Passionate about end-to-end system design, type-safe contracts, transactional idempotency, and responsive user experiences.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python (3.x), PHP (7/8), SQL, HTML5/CSS3
Frontend:	React.js, Tailwind CSS, Bootstrap, Material-UI (MUI), State Management, Responsive Web Design
Backend & APIs:	FastAPI, Node.js (Express), Django / DRF, Laravel, Restler, RESTful APIs, GraphQL
Cloud & Infrastructure:	Azure (Functions, Service Bus Queues, Key Vault, Azure AD / Entra ID, App Insights), AWS (EC2, S3, RDS, Lambda), Docker, CI/CD
Databases & Caching:	Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Redis (In-Memory Caching & Idempotency)
AI & Intelligent Systems:	LangGraph, OpenAI APIs, RAG Pipelines, Vector Search, Scikit-learn, OpenCV, SHAP
Architecture & Practices:	Fullstack Systems Architecture, Microservices, Event-Driven Design, ACID Compliance, RBAC / OAuth2, Agile/Scrum

WORK EXPERIENCE

Specialist Engineer — Successive Digital

Aug 2023 – Present

Noida, India **Core Tech:** *Python, React.js, Azure Functions, Azure Service Bus, Key Vault, LangGraph, OpenAI APIs, SQL Server*

- **Cloud Microservices Architecture:** Architected serverless, event-driven payment processing pipelines and administrative dashboard interfaces across Azure Functions, Service Bus Queues, and Key Vault, ensuring 99.95% operational availability and secure token handling.
- **Generative AI Integration:** Spearheaded integration of multi-agent GenAI customer service agents (LangGraph, OpenAI APIs, MongoDB Vector Search) with reactive web chat interfaces, autonomously resolving **70%+ of support queries** and reducing average response times by 10 minutes.
- **Partner Onboarding Acceleration:** Streamlined external partner integration APIs and developer onboarding portals, increasing third-party onboarding throughput by **40%** and elevating client satisfaction scores to 80%.
- **Predictive Failure Analytics:** Built a proactive machine learning diagnostic service and telemetry views using FastAPI and Scikit-learn to analyze historical signals, predicting and flagging **92% of configuration and pipeline failures** before execution.
- **Technical Leadership & Governance:** Spearhead technical architecture reviews, API security hardening, frontend/backend code reviews, and structured documentation across cross-functional engineering pods.

Senior Associate Engineer — Successive Digital

Jun 2021 – Aug 2023

Noida, India **Core Tech:** *PHP (Laravel, Restler), JavaScript, SQL Server, Redis, Azure Active Directory, Application Insights, Git*

- **Payment Gateway Optimization:** Engineered secure RESTful APIs and merchant portal integrations for EFT and ACH transactional processing with Redis caching and SQL Server, achieving **200+ TPS throughput** with strict double-entry ledger ACID integrity.
- **Latency & Cache Tuning:** Refined SQL execution plans, database indexes, and Redis key idempotency structures, driving a **33%–40% latency reduction** on critical high-traffic transaction endpoints.
- **Observability & Incident Reduction:** Automated telemetry logging and alert routing via Azure Application Insights and dead-letter queues, cutting Mean Time to Resolution (MTTR) by **40%** and saving 14 operational hours per week.
- **Enterprise Identity:** Integrated tokenized Azure Active Directory (Azure AD) enterprise authentication, eliminating credential vulnerabilities and reducing authentication failures by 50%.

WORK EXPERIENCE (CONTINUED)

Associate Engineer — **Successive Digital** **Jan 2021 – Jun 2021**

Noida, India **Core Tech:** *JavaScript, PHP, MySQL, REST APIs, Git*

- **Fullstack Web Engineering:** Engineered fullstack web modules, responsive UI components, and reusable RESTful endpoints using JavaScript, PHP, and MySQL for high-availability applications.
- **Production Stability:** Investigated and resolved priority production tickets, implemented unit tests, and improved core system stability under peak user loads.

Analyst (Fullstack & Security Systems) — **Cyborg Cyber Forensics (CCFIS)** **Feb 2019 – Dec 2020**

Noida, India **Core Tech:** *Python (Django, DRF), Bootstrap, MySQL, Azure AD, OpenCV, Moodle*

- **Internal Systems & Inventory:** Developed Django REST Framework (DRF) backend services and responsive Bootstrap / RBAC portals for internal operations, inventory audits, and helpdesk management, reducing manual intervention by **50%**.
- **Enterprise LMS Architecture:** Built and scaled an enterprise-wide Learning Management System (LMS) using Moodle and Azure AD authentication, supporting **200,000+ concurrent learners** with zero downtime.
- **Computer Vision Proof of Concept:** Researched and prototyped a facial recognition attendance verification POC using Python, OpenCV, and dlib, improving identification throughput by 40%.
- **Security & Compliance:** Enforced strict field-level role-based access control (RBAC) and compliance audit logging for sensitive cyber forensics datasets.

KEY ENGINEERING PROJECTS

Enterprise AI Analytics — Operational Intelligence Platform *FastAPI, Python, React, Scikit-learn, SHAP, PostgreSQL, Docker*

- Built a predictive ML service and telemetry dashboard that flags **92% of preventable pipeline execution and scheduling failures** prior to run; integrated SHAP explainability parser to output diagnostic logs and risk tips.

Spire — High-Throughput Payment Processing Engine *PHP, Laravel, React/Blade, Redis, SQL Server, Azure AD, REST APIs*

- Designed transactional EFT/ACH payment gateway and merchant administration console handling **200+ TPS**; implemented Redis idempotency checks and SQL connection pooling, reducing transaction read latency from 280ms to 45ms (84% reduction) with strict ACID guarantees.

Microservices-Based Payment Integration Pipeline *Azure Functions, Azure Service Bus, Key Vault, App Insights*

- Architected serverless integration pipelines for decoupled third-party payment settlement; automated error recovery via dead-letter queues, saving 14 operational hours/week.

GenAI Customer Support & Semantic Caching (KagenAI) *Python, React, LangGraph, OpenAI APIs, MongoDB Vector Search*

- Architected multi-agent state graph pipeline with reactive chat interface and semantic vector query caching; automated **70%+ of customer support volume** and saved 97% on token expenses via semantic matching on historical resolutions.

CERTIFICATIONS

- **AWS Certified Developer – Associate**
  Amazon Web Services | Oct 2023 – Oct 2026 (License: 71JSNNK2XBBE1MK6)
- **GraphQL Certified Developer**
  Apollo / GraphQL Foundation | 2024
- **Building AI Apps with MongoDB on AWS**
  MongoDB + AWS | 2025 (Credential: 7f8ed941)
- **Machine Learning with Python**
  IBM | 2023 (Credential: 99301c5c)
- **MongoDB Certified Developer, Associate**
  MongoDB | Jan 2023 (License: MDBrvz2rvo387)
- **CTS: AI in Action**
  Google Cloud (GC) | 2026 (Credential: 8cd4cbaa)
- **Certified Agile Leadership Essentials (CAL-E)**
  Scrum Alliance | 2023
- **Docker Essentials**
  IBM | 2023 (License: b2c28cd9)

HONORS & ACHIEVEMENTS

- **Quarterly Star Performer Award** — **Successive Digital (Q3 2024)**: Awarded for outstanding technical excellence, high ownership, and critical backend delivery under challenging deadlines.
- **Outstanding Performance Award** — **Successive Digital (Q2 2024)**: Recognized for excellent engineering contributions, database optimization (40% latency reduction), and peer mentorship.
- **Special Recognition Award** — **Successive Digital (Q4 2023)**: Honored for building innovative AI automated support workflows and robust microservice telemetry monitoring pipelines.

IEEE CONFERENCE PUBLICATIONS

- **Meta-BRISQUE: Cost Efficient Image Spoofing Detection for Realtime Face Applications** — *IEEE Conference (2020)*. DOI: 10.1109/ICCMC48092.2020.9197918
- **An EMD-Based Approach for Saliency Detection in Multimedia Data** — *IEEE Conference (2020)*. DOI: 10.1109/ICCMC48092.2020.9058073
- **A Review on Video Summarization Approaches: Recent Advances and Directions** — *IEEE Conference (2019)*. DOI: 10.1109/ICETET-SIP-1946815.2019.8748574

EDUCATION

Master of Technology (M.Tech) in Computer Science & Engineering — Amity University **2017 – 2019**
Focus: Video Summarization, Computer Vision & Machine Learning | Noida, India

Bachelor of Technology (B.Tech) in Computer Science & Engineering — Echelon Institute of Technology (MDU) **2012 – 2016**
Faridabad / New Delhi, India
