AMIT BORA

Senior Backend Engineer | Cloud-Native Microservices | Payment Systems | Practical AI

New Delhi, India • +91 8527520048 • amitbora007@gmail.com • Portfolio: amitbora.vercel.app • LinkedIn: in/amitbora2 • GitHub: amitbora007 • Credly: amit.bora

PROFESSIONAL SUMMARY

Senior Backend Engineer with **7+ years of experience** architecting, scaling, and securing enterprise microservices, high-throughput payment gateways, and production Generative AI integrations. Proven track record leading backend engineering at Successive Digital, optimizing API performance by **33%–40%**, sustaining **200+ TPS** workloads, and lowering MTTR by 40% on Azure and AWS cloud infrastructures. Certified AWS Developer and MongoDB Associate Developer with 3 published IEEE research papers in machine learning and computer vision. Strong proponent of clean architecture, transactional idempotency, and resilient distributed systems.

TECHNICAL SKILLS

Backend & Languages:	Python (3.x), PHP (7/8), JavaScript (ES6+), TypeScript, SQL, Bash, Object-Oriented Programming (OOP)
Frameworks & APIs:	FastAPI, Django, Django REST Framework (DRF), Laravel, Restler, Node.js (Express), RESTful API Design
Cloud & Infrastructure:	Azure (Functions, Service Bus Queues, Key Vault, Azure AD / Entra ID, App Insights), AWS (EC2, S3, RDS, Lambda), Docker
Databases & Caching:	Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Redis (In-Memory Caching & Idempotency), Vector DBs
AI & Machine Learning:	LangGraph (Multi-Agent State Graphs), OpenAI APIs, RAG Pipelines, Scikit-learn, OpenCV, SHAP (Explainable AI)
Architecture & Practices:	Microservices, Event-Driven Architecture, Asynchronous Messaging, ACID Compliance, RBAC / OAuth2, CI/CD, Agile/Scrum

WORK EXPERIENCE

Specialist Engineer — Successive Digital
Aug 2023 – Present

Noida, India **Core Tech:** *Python, PHP, Azure Functions, Azure Service Bus, Key Vault, LangGraph, OpenAI APIs, SQL Server*

- **Cloud Microservices Architecture:** Architected serverless, event-driven payment processing pipelines across Azure Functions, Service Bus Queues, and Key Vault, ensuring 99.95% operational availability and secure token handling.
- **Generative AI Integration:** Spearheaded integration of multi-agent GenAI customer service agents (LangGraph, OpenAI APIs, MongoDB Vector Search), autonomously resolving **70%+ of support queries** and reducing average response times by 10 minutes.
- **Partner Onboarding Acceleration:** Streamlined external partner integration APIs and developer onboarding contracts, increasing third-party onboarding throughput by **40%** and elevating client satisfaction scores to 80%.
- **Predictive Failure Analytics:** Built a proactive machine learning diagnostic service using FastAPI and Scikit-learn to analyze historical telemetry signals, predicting and flagging **92% of configuration and pipeline failures** before execution.
- **Technical Leadership & Governance:** Spearhead technical architecture reviews, API security hardening, code reviews, and structured documentation across cross-functional engineering pods.

Senior Associate Engineer — Successive Digital
Jun 2021 – Aug 2023

Noida, India **Core Tech:** *PHP (Laravel, Restler), SQL Server, Redis, Azure Active Directory, Application Insights, Git*

- **Payment Gateway Optimization:** Engineered secure RESTful APIs for EFT and ACH transactional processing with Redis caching and SQL Server, achieving **200+ TPS throughput** with strict double-entry ledger ACID integrity.
- **Latency & Cache Tuning:** Refined SQL execution plans, database indexes, and Redis key idempotency structures, driving a **33%–40% latency reduction** on critical high-traffic transaction endpoints.
- **Observability & Incident Reduction:** Automated telemetry logging and alert routing via Azure Application Insights and dead-letter queues, cutting Mean Time to Resolution (MTTR) by **40%** and saving 14 operational hours per week.
- **Enterprise Identity:** Integrated tokenized Azure Active Directory (Azure AD) enterprise authentication, eliminating credential vulnerabilities and reducing authentication failures by 50%.

Associate Engineer — Successive Digital
Jan 2021 – Jun 2021

Noida, India **Core Tech:** *PHP, JavaScript, MySQL, REST APIs, Git*

- Engineered backend business logic modules and reusable RESTful endpoints using PHP and MySQL for high-availability web applications.
- Investigated and resolved priority production tickets, implemented unit tests, and improved core system stability under peak user loads.

Analyst (Backend & Security Systems) — **Cyborg Cyber Forensics and Information Security (CCFIS)** **Feb 2019 – Dec 2020**

Noida, India **Core Tech:** *Python (Django, DRF), MySQL, Azure AD, OpenCV, Moodle, Bootstrap*

- **Internal Systems & Inventory:** Developed Django REST Framework (DRF) backend services and RBAC dashboards for internal operations, inventory audits, and helpdesk management, reducing manual intervention by **50%**.
- **Enterprise LMS Architecture:** Built and scaled an enterprise-wide Learning Management System (LMS) using Moodle and Azure AD authentication, supporting **200,000+ concurrent learners** with zero downtime.
- **Computer Vision Proof of Concept:** Researched and prototyped a facial recognition attendance verification POC using Python, OpenCV, and dlib, improving identification throughput by 40%.

KEY ENGINEERING PROJECTS

Enterprise AI Analytics — Operational Intelligence Platform **FastAPI, Python, Scikit-learn, SHAP, PostgreSQL, Docker**

- Co-developed a predictive machine learning service that flags **92% of preventable pipeline execution and scheduling failures** prior to run. Integrated SHAP explainability parser to output diagnostic logs and risk tips for platform operators.

Spire — High-Throughput Payment Processing Engine **PHP, Laravel, Redis, SQL Server, Azure AD, REST APIs**

- Designed transactional EFT/ACH payment gateway handling **200+ TPS**. Implemented Redis idempotency checks and SQL connection pooling, reducing transaction read latency from 280ms to 45ms (84% reduction) with strict ACID guarantees.

GenAI Customer Support & Semantic Caching System (KagenAI) **Python, LangGraph, OpenAI APIs, MongoDB Vector Search**

- Architected multi-agent state graph pipeline with semantic vector query caching. Automated **70%+ of customer support volume** and saved 97% on token expenses via semantic matching on historical resolutions.

CERTIFICATIONS & HONORS

• **AWS Certified Developer – Associate** — Amazon Web Services (AWS) | Oct 2023 – Oct 2026 (License: 71JSNNK2XBBE1MK6)

• **MongoDB Certified Developer, Associate** — MongoDB | Jan 2023 (License: MDBrvz2rvo387)

• **CTS: AI in Action** — Google Cloud (GC) | 2026

• **Building AI Apps with MongoDB on AWS** — MongoDB + AWS | 2025

• **Certified Agile Leadership Essentials (CAL-E)** — Scrum Alliance | 2023

• **Machine Learning with Python** — IBM | 2023

• **Quarterly Star Performer Award (Q3 2024)** & **Outstanding Performance Award (Q2 2024)** — Successive Digital

IEEE CONFERENCE PUBLICATIONS

• **Meta-BRISQUE: Cost Efficient Image Spoofing Detection for Realtime Face Applications** — *IEEE Conference (2020)*. DOI: 10.1109/ICCMC48092.2020.9197918

• **An EMD-Based Approach for Saliency Detection in Multimedia Data** — *IEEE Conference (2020)*. DOI: 10.1109/ICCMC48092.2020.9058073

• **A Review on Video Summarization Approaches: Recent Advances and Directions** — *IEEE Conference (2019)*. DOI: 10.1109/ICETET-SIP-1946815.2019.8748574

EDUCATION

Master of Technology (M.Tech) in Computer Science & Engineering — Amity University **2017 – 2019**

Focus: Video Summarization, Computer Vision & Machine Learning | Corporate Resource Centre Member | Noida, India

Bachelor of Technology (B.Tech) in Computer Science & Engineering — Echelon Institute of Technology (MDU) **2012 – 2016**

Faridabad / New Delhi, India
